Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from A Laboratory Manual of Physics and Applied Electricity, Vol. 2 of 2 Little need be added, in bringing this second volume of the Manual before the public, to what has already been said in the preface to the first volume. The first volume consists of a laboratory course in general physics for beginners, in the performance of which the student is guided by explicit directions as to the method of manipulation and the arrangement of results. The present volume is intended for students who have completed such a course, and who are prepared to take up special work. The needs of those who are in training to become electrical engineers have been especially considered, and it is for them particularly that Parts I., II., and III., which treat of Applied Electricity, Heat, and Photometry, have been written. To add to the usefulness of the volume to the student of general physics, Part IV. has been prepared. The editor desires to express his obligations to his colaborers, to whose efforts the various parts of this Manual are due, and in particular to Dr. Frederick Bedell for his assistance in carrying the work through the press.
